# Conformance Requirement

Go up to Terms and Definitions

## Discussion

A Conformance Requirement is a Requirement whose satisfaction contributes to determining Conformance.

A Conformance Requirement forms part of an applicable Conformance Model and may be included within one or more Conformance Profiles.

A Conformance Requirement is evaluated using one or more Conformance Criteria at identified Conformance Points.

## Definition

*requirement whose satisfaction contributes to determining conformance*

## Source

- [DTE6], Section 6.4.6, *Implementation Conformance Model*

## Note

Not every Requirement in a specification necessarily constitutes a Conformance Requirement.

A specification identifies which Requirements participate in Conformance Assessment.

## Example

A DIDO-TE Requirement stating that a test implementation shall preserve required Evidence is a Conformance Requirement because its satisfaction contributes to determining Conformance.
