

4.6.2 Additional Specifications

[Return to Responding to RFP Items](#)

Submissions MAY include additional specifications for items not covered by the RFP when submitters believe those items are necessary.

Submitters SHOULD clearly distinguish information about these additional items from information that directly responds to the RFP requirements.

Submitters SHALL give a detailed rationale for why any additional specifications should also be considered for adoption.

Submitters should note that a Task Force is unlikely to consider additional items already on an OMG Task Force roadmap, as doing so would preempt the normal adoption process.
