

6.2.2 Out of Scope

[Return to Scope of Proposals Sought](#)

The requested [Reference Architecture](#) is limited to architectural abstraction and governance constructs.

The following exclusions clarify the boundaries of the requested Reference Architecture and prevent overlap with existing OMG specifications, domain standards, and implementation technologies.

1. Proposals SHALL NOT define domain-specific data content or operational data models.
2. Proposals SHALL NOT define transport protocols, message exchange frameworks, or runtime communication mechanisms.
3. Proposals SHALL NOT replace, supersede, or modify existing OMG specifications addressing exchange, interoperability, or semantic federation.
4. Proposals SHALL NOT standardize any specific ontology, vocabulary, or domain taxonomy.
5. Proposals SHALL NOT define operational doctrine, mission procedures, or domain policy rules.
6. Proposals SHALL NOT prescribe specific implementation technologies, deployment topologies, or system architectures.
7. Proposals SHALL NOT require the use of any specific modeling language, transport framework, or vendor tooling environment.
