## Structured Information Processing

## Reference Architecture

### (SIP-RA)

Request for Proposal\*\*

OMG Document: C4I/YYYY-MM-DD

Letters of Intent due: DD Month YYYY

Submissions due: DD Month YYYY

### The Objective of this RFP

This request for proposals seeks a platform-independent Reference Architecture governing the controlled processing of structured information artifacts in mission-critical and regulated environments. The requested architecture defines architectural constructs that separate data, structure, semantics, and interpretation; establish governed processing flows across defined boundaries; preserve jurisdictional authority over structural and semantic definitions; and support modular, inspectable, and reproducible information processing independent of specific implementation technologies.
