

1.4 About the Wiki

[Go to 1. Introduction](#)

The Crucible wiki is a structured, linked publication that provides direct access to operational concepts, controlled terminology, requirements, architecture, lifecycle activities, and implementation guidance.

The wiki preserves the ordered organization of a conventional document while allowing readers to navigate directly to the page or section relevant to their responsibilities. Each major subject resides on its own page and has a stable URI that can be referenced from requirements, architecture pages, issues, reviews, emails, and external documents.
