

C.1 Mission Objectives

[Go to Crucible Requirements](#)

The Mission Objectives identify the high-level outcomes that guide the [Crucible](#) requirements, architecture, implementation, operation, and [Operational Lifecycle](#).

These objectives address infrastructure creation, deployment duration, platform independence, connected and disconnected operation, reusable and version-controlled infrastructure, and lifecycle management.

- [MO-004 — Connected and Disconnected Operations](#)
- [MO-005 — Reusable and Version-Controlled Infrastructure Baselines](#)
- [MO-006 — Infrastructure Lifecycle Management](#)

Notes for Editors

The individual requirement pages should retain the stable identifiers M0-001 through M0-006.

The source statements should preserve the wording from the controlling System Requirements Specification.

Normalized statements should replace weak verbs and undefined qualifiers with direct, testable behavior and applicable acceptance criteria.

Incoming traceability should use the wiki Backlinks function rather than a manually maintained list.

To reference a requirement Statement from another wiki page, insert:

```
{{section><namespace>#Statement&noheader&nofooter&noeditbtn}}
```

Replace <namespace> with the namespace of the requirement page to reference.

The section name following # SHALL match the section heading verbatim on the requirement page.

Do not rename requirement pages after an external citation unless a redirect or move plan is in place.
