

[DTE7] Federated Data Interpretation Systems Reference Architecture (FDIS-RA)

[Go up to References](#)

Reference Identifier

DIDO-TE: [DTE7]

Citation

Dido Solutions, Inc. and Jackrabbit Consulting, Inc. *Federated Data Interpretation Systems Reference Architecture (FDIS-RA)*.

URI

<https://wiki.didosolutions.com/dido/01-fdis-ra/start>

Note

This reference provides architectural concepts and requirements relevant to governed interpretation, validation, provenance, traceability, conformance, lifecycle management, and long-term comparability across distributed and regulated information-processing environments.

DIDO-TE derives applicable concepts, terminology, and requirements from FDIS-RA where those concepts govern testing, validation, evidence handling, conformance assessment, reproducibility, or controlled comparison of independently developed systems.

Requirements derived from this reference identify the applicable section, clause, figure, table, requirement, or other source location.

Applicable concepts include:

- [Conformance](#)
- [Conformance Model](#)
- [Evidence](#)
- [Traceability](#)
- [Auditability](#)
- [Comparability](#)
- [Reproducibility](#)
- [Evidentiary Continuity](#)

- [Legal and Regulatory Defensibility](#)

Where DIDO-TE specialises, narrows, or operationalises an FDIS-RA concept, the derived requirement or glossary entry identifies the FDIS-RA source and the resulting DIDO-TE interpretation.

FDIS-RA does not, by itself, prescribe the implementation of the DIDO Test Environment. DIDO-TE uses FDIS-RA as an architectural source for applicable requirements and governance principles.
