

Annex B: References

[Go to Annexes](#)

Annex B identifies the references used by the [Distributed Immutable Data Object Test Environment \(DIDO-TE\)](#).

Each DIDO-TE-specific reference has a stable identifier and URI so requirements, architecture sections, definitions, and other records can cite source material consistently.

DIDO-TE-specific references use identifiers in the form [DTE_n], where n is the assigned reference number.

Individual reference pages are leaf pages and use namespaces in the form:

```
dte-NNN
```

The reference identifier remains stable throughout the lifecycle of the reference.

References

- [\[DTE1\] U.S. Patent Application US20220237111A1](#)
- [\[DTE2\] Non-Traditional BAA Submission](#)
- [\[DTE3\] Draft BAA White Paper](#)
- [\[DTE4\] DIDO Reference Data Model](#)
- [\[DTE5\] DIDO-TE Requirements Register](#)
- [\[DTE6\] Structured Information Processing Reference Architecture \(SIP-RA\)](#)
- [\[DTE7\] Federated Data Interpretation Systems Reference Architecture \(FDIS-RA\)](#)
- [\[DTE8\] Reference Architecture Description](#)
- [\[DTE9\] Distributed Immutable Data Object Reference Architecture \(DIDO-RA\)](#)
- [\[DTE10\] OMG CBDC Working Group Response to the Federal Reserve Discussion Paper](#)

Citation Use

Citations use the stable reference identifier followed by the most precise applicable source location.

For example:

```
[[dido:03-dido-te:99-annexes:annex-b-references:dte-002|[DTE2]]], Section 2.1.1.
```

A citation to a model identifies the applicable package, diagram, model element, datatype, attribute, association, or other relevant model element.

For example:

```
[[dido:03-dido-te:99-annexes:annex-b-references:dte-004|[DTE4]]], model element //Test Plan//.
```

- [\[DTE2\] Non-Traditional BAA Submission](#)
- [\[DTE3\] Broad Agency Announcement White Paper](#)
- [\[DTE4\] DIDO Reference Data Model](#)
- [\[DTE5\] DIDO-TE Requirements Register](#)
- [\[DTE6\] Structured Information Processing Reference Architecture \(SIP-RA\)](#)
- [\[DTE7\] Federated Data Interpretation Systems Reference Architecture \(FDIS-RA\)](#)
- [\[DTE8\] Reference Architecture Description](#)
- [\[DTE9\] Distributed Immutable Data Object Reference Architecture \(DIDO-RA\)](#)
- [\[DTE10\] OMG CBDC Working Group Response to the Federal Reserve Discussion Paper](#)

Notes for Editors

Assign each new DIDO-TE-specific reference the next available DTE identifier.

Maintain each reference as a separate leaf page with a stable URI.

Do not reuse or renumber an assigned reference identifier.

Use the reference page as the canonical citation target.

Identify the most precise source location available when deriving a requirement or architectural statement from a reference.

Preserve historical references when existing requirements, evidence, reports, or externally published documents cite an earlier revision.

When a referenced source is superseded, record the supersession relationship on the applicable reference page.

Do not rename a reference page after external citation unless a redirect or move plan is in place.
