

ENV-001e — Identify Required Test Resources

[Go to ENV-001 — Define Test Environment](#)

Statement

The [DIDO-TE](#) SHALL identify each [Test Resource](#) required by a [Test Environment](#) or record that the Test Environment requires no Test Resource and provide the basis for the determination.

Derived From

- [\[DTE5\] DIDO-TE Requirements Register](#), source requirement identifier and obligation to be assigned
- [\[DTE6\] Structured Information Processing Reference Architecture \(SIP-RA\)](#)
- [\[DTE7\] Federated Data Interpretation Systems Reference Architecture \(FDIS-RA\)](#)

Rationale

Identifying the required [Test Resources](#) establishes the resources needed to instantiate and operate a [Test Environment](#).

The recorded resource requirements support provisioning, availability assessment, [Configuration](#), and confirmation that the Test Environment satisfies the resource needs of each applicable [Test Definition](#).

An explicit determination that no Test Resource is required distinguishes an intentional condition from missing information.

Applies To

- [Test Environment](#)
- [Test Resource](#)

Verification

Verification confirms that:

- Each Test Environment identifies every required Test Resource.
- Each identified Test Resource has an explicit relationship to the Test Environment.
