

CON-007 Technology-Independent Conformance

[Return to C.1 Conformance Requirements](#)

Statement

The [Conformance Model](#) SHALL determine [Conformance](#) independently of implementation technology.

Derived From

- [\[DTE6\]](#), Section 6.4.6, *Implementation Conformance Model*

Rationale

Technology-independent Conformance preserves the architectural nature of DIDO-TE by separating satisfaction of architectural [Requirements](#) from the technologies used to realise them.

This separation supports evaluation of heterogeneous implementations without making a particular product, platform, protocol, modelling language, deployment topology, or implementation mechanism a prerequisite for Conformance.

Applies To

- DIDO-TE specification

Verification

Verification confirms that:

1. the Conformance Model determines Conformance independently of implementation technology

Referenced By

The following pages reference this requirement:

Plugin Backlinks: Nothing was found.

Delivery Phase

☐ Determine the delivery phase.

Implementation Status

☐ Determine implementation status.

Requirement Status

☐ The proposed derived requirement requires review and acceptance.

Issues

None.
