Notes for Editors

The DIDO-TE annexes provide supporting information for the main body of the DIDO-TE documentation.

Annex B identifies terms used by DIDO-TE and references the controlling definitions in the shared DIDO Solutions Terms and Definitions corpus.

Annex C contains the authoritative DIDO-TE requirements register.

Annex D preserves traceability between the DIDO-TE patent family, patent concepts, requirements, architecture, test procedures, and Evidence.

Major annexes and annex sections that contain subordinate pages retain a trailing :start in their namespaces.

Leaf annex pages omit a trailing :start.

Do not rename a cited annex page unless a redirect or move plan is in place.
