

P1-REQ-13-10-003

[Return to Part 1 Requirements](#)

Statement

A Deployment, Testability, and [Evidence](#) Plan SHALL preserve the conceptual definitions inherited from this part.

Source

Part 1, Section 13.10: Profile and Layering Requirements.

Rationale

A Deployment, Testability, and Evidence Plan describes deployment arrangements, verification approach, evidence expectations, and related operational concerns. It inherits conceptual definitions from Part 1 and applies them to deployment, testing, and evidence contexts.

This requirement prevents deployment, testability, or evidence planning from redefining inherited conceptual meaning. It preserves the separation between conceptual architecture and operational realization.

Applies To

This requirement applies to Deployment, Testability, and Evidence Plans that inherit conceptual definitions from Part 1.

It applies specifically to:

- Deployment planning
- Testability planning
- Evidence planning
- Operational realization
- Inherited conceptual definitions

Verification

Verification SHALL confirm that each Deployment, Testability, and Evidence Plan preserves the conceptual definitions inherited from Part 1.

Verification activities include review checks confirming that:

- Deployment terms trace to inherited conceptual definitions where applicable
- Testability material preserves inherited conceptual meaning
- Evidence material preserves inherited conceptual meaning
- Deployment artifacts do not redefine conceptual elements
- Evidence records support claims without replacing conceptual definitions
