

P1-REQ-13-8-002

[Return to Part 1 Requirements](#)

Statement

[Evidence](#) SHALL support claims about architecture, implementation, deployment, execution, [Interpretation](#), [Governance and Authority](#), or review.

Source

Part 1, Section 13.8: Evidence Requirements.

Rationale

Evidence provides recorded support for claims made across the architecture lifecycle. These claims can concern architecture, implementation, deployment, execution, interpretation, governance and authority, or review conclusions.

This requirement ensures that Evidence has a defined evidentiary purpose and supports a specific claim or review purpose rather than existing as disconnected recorded material.

Applies To

This requirement applies to Evidence records and evidence references.

It applies specifically to claims about:

- Architecture
- Implementation
- Deployment
- Execution
- Interpretation
- Governance and Authority
- Review

Verification

Verification SHALL confirm that Evidence supports claims about architecture, implementation, deployment, execution, Interpretation, Governance and Authority, or review.

Verification activities include review checks confirming that:

- Evidence identifies the claim it supports
- Evidence records relate to an architectural lifecycle concern
- Evidence supports interpretation or governance claims where applicable
- Evidence supports review conclusions where applicable
