

P2-REQ-16-10-003

[Return to Requirements](#)

Statement

A Domain Logical Profile SHALL identify the Part 2 logical elements it inherits unchanged.

Source

Part 2, Section 16.10: Profile and Implementation Boundary Requirements.

Rationale

Explicitly identifying inherited logical elements distinguishes reused architecture from specialised architecture. This improves architectural review, governance, compatibility assessment, and traceability.

Applies To

This requirement applies to Domain Logical Profiles.

It applies specifically to:

- Inherited logical elements;
- Domain Logical Profiles; and
- Logical Architecture / PIM.

Verification

Verification SHALL confirm that inherited Part 2 logical elements are explicitly identified.

Verification activities should include review checks confirming that:

- inherited logical elements are documented;
- inherited meaning is preserved;
- no unintended changes are introduced; and
- traceability to Part 2 exists.

Traceability

This requirement supports traceability between inherited Part 2 logical elements and Domain Logical Profiles.
