

P2-REQ-16-10-004

[Return to Requirements](#)

Statement

A Domain Logical Profile SHALL identify the Part 2 logical elements it specialises.

Source

Part 2, Section 16.10: Profile and Implementation Boundary Requirements.

Rationale

Explicit identification of specialised logical elements enables reviewers to distinguish new domain behaviour from inherited architecture while preserving governance and traceability.

Applies To

This requirement applies to Domain Logical Profiles.

It applies specifically to:

- Specialised logical elements;
- Domain Logical Profiles; and
- Logical Architecture / PIM.

Verification

Verification SHALL confirm that specialised Part 2 logical elements are explicitly identified.

Verification activities should include review checks confirming that:

- specialised elements are documented;
- specialisations preserve inherited meaning;
- changes are justified; and
- traceability is maintained.

Traceability

This requirement supports traceability between specialised logical elements and their inherited Part 2 definitions.
