

P2-REQ-16-9-010

[Return to Requirements](#)

Statement

Logical [Traceability](#) SHALL support forward review from the conceptual concern to the logical model.

Source

Part 2, Section 16.9: Logical Traceability Requirements.

Rationale

Forward traceability allows reviewers to follow the refinement of conceptual concerns into the Logical Architecture. This capability demonstrates that every logical element is grounded in a conceptual purpose, supporting architectural validation, governance, and impact analysis.

Applies To

This requirement applies to the Logical Traceability Model.

It applies specifically to:

- Conceptual concerns;
- Logical elements;
- Architectural reviews; and
- Governance activities.

Verification

Verification SHALL confirm that Logical Traceability supports forward review from conceptual concerns to logical elements.

Verification activities should include review checks confirming that:

- conceptual sources are identified;
- logical elements trace to conceptual concerns;
- forward navigation is possible; and
- conceptual intent is preserved.

Traceability

This requirement supports traceability from the Part 1 Conceptual Architecture to the Part 2 Logical Architecture.
