

P3-REQ-17-10-001

[Return to Requirements](#)

Statement

The FX Demo Logical Profile SHALL define an FX Logical Governance Model.

Source

Part 3, Section 17.10: FX Logical Governance Requirements.

Rationale

The FX Logical Governance Model establishes the platform-independent architectural framework for governing the creation, maintenance, evolution, and use of FX logical architecture elements. It provides the architectural basis for managing ownership, compatibility, change, admission, policy, and lifecycle governance while remaining independent of implementation technologies and operational governance tools.

By defining governance as part of the logical architecture, the FX Demo Logical Profile enables multiple Implementation Profiles to apply consistent governance principles while using different organizational processes and implementation technologies.

Applies To

This requirement applies to the definition, maintenance, review, and evolution of the FX Demo Logical Profile.

It applies specifically to:

- logical governance;
- architectural governance;
- profile management;
- conformance assessment; and
- derived Implementation Profiles.

Verification

Verification SHALL confirm that the FX Demo Logical Profile defines an FX Logical Governance Model.

Verification activities should include review checks confirming that:

- the governance model is defined;
- governance responsibilities are represented;
- the governance model remains platform independent; and
- governance concepts are applied consistently throughout the profile.

Traceability

This requirement establishes the logical governance architecture for the FX Demo Logical Profile.
