

P3-REQ-17-10-003

[Return to Requirements](#)

Statement

FX Logical Ownership of Definitions SHALL identify responsibility for defining, maintaining, approving, and reviewing FX logical definitions.

Source

Part 3, Section 17.10: FX Logical Governance Requirements.

Rationale

Logical definitions require clearly identified ownership to ensure consistent architectural meaning, controlled evolution, and accountable governance throughout their lifecycle. Identifying responsibility for defining, maintaining, approving, and reviewing FX logical definitions establishes architectural accountability while preserving platform independence and avoiding dependence on organizational structures or implementation technologies.

Maintaining explicit ownership also supports traceability, governance, interoperability, and consistent management across multiple Implementation Profiles.

Applies To

This requirement applies to all logical definitions governed by the FX Demo Logical Profile.

It applies specifically to:

- logical definition ownership;
- governance responsibilities;
- architectural governance;
- conformance assessment; and
- derived Implementation Profiles.

Verification

Verification SHALL confirm that responsibility for FX logical definitions is explicitly identified.

Verification activities should include review checks confirming that:

- ownership responsibilities are identified;
- definition, maintenance, approval, and review responsibilities are distinguished;
- governance responsibilities are consistently applied; and
- implementation-specific organizational structures are not prescribed.

Traceability

This requirement establishes governance accountability for FX logical definitions.
