

P3-REQ-17-11-001

[Return to Requirements](#)

Statement

The FX Demo Logical Profile SHALL define an FX Demo Logical Traceability Model.

Source

Part 3, Section 17.11: FX Logical Traceability Requirements.

Rationale

The FX Demo Logical Traceability Model establishes the architectural framework for relating conceptual architecture, logical architecture, and future implementation artefacts. By defining traceability as a logical architectural concern, the FX Demo Logical Profile preserves consistency, governance, evidence, and architectural meaning throughout the system lifecycle while remaining independent of implementation technologies.

A defined traceability model enables consistent architectural review, impact assessment, governance, and conformance verification across multiple Implementation Profiles.

Applies To

This requirement applies to the FX Demo Logical Profile.

It applies specifically to:

- logical traceability;
- architectural governance;
- profile management;
- conformance assessment; and
- derived Implementation Profiles.

Verification

Verification SHALL confirm that the FX Demo Logical Profile defines an FX Demo Logical Traceability Model.

Verification activities should include review checks confirming that:

- a logical traceability model is defined;
- traceability relationships are represented consistently;
- traceability remains platform independent; and
- architectural traceability supports governance and evidence.

Traceability

This requirement establishes the logical traceability architecture for the FX Demo Logical Profile.
