

P3-REQ-17-11-003

[Return to Requirements](#)

Statement

The FX Demo Logical Traceability Model SHALL define traceability from Part 2 logical elements to FX logical profile elements.

Source

Part 3, Section 17.11: FX Logical Traceability Requirements.

Rationale

The FX Demo Logical Profile specializes the platform-independent logical architecture defined in Part 2. Traceability from Part 2 logical elements to FX logical profile elements demonstrates how the FX profile derives from the broader logical architecture while preserving architectural consistency, governance, and interoperability.

Maintaining this relationship supports architectural review, impact analysis, and conformance verification without constraining future implementation technologies.

Applies To

This requirement applies to traceability relationships between Part 2 logical architecture and the FX Demo Logical Profile.

It applies specifically to:

- logical architecture;
- logical profile specialization;
- architectural governance;
- conformance assessment; and
- derived Implementation Profiles.

Verification

Verification SHALL confirm that traceability exists from Part 2 logical elements to FX logical profile elements.

Verification activities should include review checks confirming that:

- logical source elements are identified;
- FX logical profile elements reference their Part 2 origins;
- traceability relationships are complete and consistent; and
- architectural specialization is documented.

Traceability

This requirement establishes traceability between the Part 2 logical architecture and the FX Demo Logical Profile.
