

P3-REQ-17-11-004

[Return to Requirements](#)

Statement

The FX Demo Logical Traceability Model SHALL define:

- FX Node Traceability
- FX Endpoint Traceability
- FX Information Structure Traceability
- FX Runtime Plane Traceability
- FX Interaction Traceability
- FX Evidence Traceability

Source

Part 3, Section 17.11: FX Logical Traceability Requirements.

Rationale

The FX Demo Logical Traceability Model is composed of multiple complementary traceability views that collectively establish architectural relationships across the logical profile. Each traceability category captures a distinct aspect of the logical architecture while preserving consistent governance, interoperability, evidence, and architectural meaning.

Defining these traceability categories enables complete architectural review without prescribing implementation-specific traceability repositories or tooling.

Applies To

This requirement applies to the FX Demo Logical Traceability Model.

It applies specifically to:

- logical traceability;
- architectural governance;
- profile management;
- conformance assessment; and
- derived Implementation Profiles.

Verification

Verification SHALL confirm that the FX Demo Logical Traceability Model defines all required traceability categories.

Verification activities should include review checks confirming that:

- each required traceability category is defined;
- relationships between traceability categories are consistent;
- traceability remains platform independent; and
- implementation-specific traceability technologies are not prescribed.

Traceability

This requirement defines the traceability capabilities established by the FX Demo Logical Traceability Model.
