

P4-REQ-21-15-002

[Return to Requirements](#)

Statement

The Part 5 handoff SHALL identify implementation node mappings.

Source

Part 4, Section 21.15: Part 5 Handoff Requirements.

Rationale

Part 5 must know which Phase 0 implementation participants realize the applicable FX logical Nodes and Node Roles before those participants can be deployed, started, observed, tested, or evidenced.

Including implementation node mappings in the handoff preserves responsibility and architectural traceability during Part 5 activities.

Applies To

This requirement applies to:

- implementation node modules;
- runtime participants;
- FX logical Node mappings;
- FX logical Node Role mappings; and
- applicable supporting modules.

Verification

Verification SHALL confirm that the Part 5 handoff identifies the applicable implementation node mappings.

Verification activities should include review checks confirming that:

- implementation participants are identified;
- applicable FX logical Nodes are identified;
- applicable Node Roles are identified; and
- mappings are sufficient for Part 5 deployment and observation planning.

Traceability

This requirement carries the Part 4 logical Node-to-implementation mappings into the Part 5 handoff.
