

P4-REQ-21-15-009

[Return to Requirements](#)

Statement

The Part 5 handoff SHALL identify the script model.

Source

Part 4, Section 21.15: Part 5 Handoff Requirements.

Rationale

Part 5 may use approved scripts to prepare, start, stop, clean, or otherwise support the Phase 0 implementation environment.

Including the script model in the handoff ensures that Part 5 uses controlled automation with known purposes, inputs, outputs, logging behavior, error handling, and baseline relationships.

Applies To

This requirement applies to:

- prerequisite-checking scripts;
- generation scripts;
- build-preparation scripts;
- startup and shutdown scripts;
- cleanup scripts; and
- other approved Phase 0 scripts.

Verification

Verification SHALL confirm that the Part 5 handoff identifies the Phase 0 Script and Execution Model.

Verification activities should include review checks confirming that:

- approved script categories are identifiable;
- script purposes are identifiable;
- usage expectations are available; and
- scripts used by Part 5 remain governed by Part 4 and the Developer Handbook.

Traceability

This requirement carries the Part 4 Script and Execution Model into Part 5 operational use.
