

P4-REQ-21-15-010

[Return to Requirements](#)

Statement

The Part 5 handoff SHALL identify Developer Handbook requirements.

Source

Part 4, Section 21.15: Part 5 Handoff Requirements.

Rationale

The implementation artifacts used by Part 5 are produced under the development discipline defined by the Phase 0 Developer Handbook.

Including applicable handbook requirements in the handoff allows Part 5 reviewers to understand the conventions governing source artifacts, generated artifacts, scripts, logging, exception handling, traceability, and repository workflow.

Applies To

This requirement applies to:

- Developer Handbook requirements;
- Phase 0 implementation artifacts;
- scripts;
- logging and exception-handling conventions;
- repository workflow; and
- review expectations.

Verification

Verification SHALL confirm that the Part 5 handoff identifies the Developer Handbook requirements applicable to the handed-off artifacts.

Verification activities should include review checks confirming that:

- applicable handbook rules are identifiable;
- artifact-governance expectations are available;

- logging and exception-handling rules are available where applicable; and
- Part 5 does not replace or redefine handbook requirements.

Traceability

This requirement carries the Part 4 development-discipline requirements into the Part 5 handoff.
