

Part 0: Document Set Overview and Reader's Guide

[Go to The FX Demo Root](#)

Financial Systems Archetype

Foreign Exchange (FX) Demo

Abstract

Part 0 introduces the Financial Systems Archetype document set, explains the purpose of the part-based structure, and provides the reader with a navigation model for the architecture. It describes how the document set separates conceptual meaning, logical architecture, implementation profiling, developer guidance, and governed operational extensions. It also explains how the Financial Systems Archetype relates to the parent Structured Data Interpretation System/Structured Information Processing Reference Architecture and the FX Demo Reference Architecture. Part 0 establishes the reading order, the intended audience for each part, and the rules that prevent later parts from redefining concepts established earlier.

Intended use

Entry point for Part 0 of the FX Demo / Financial Systems Archetype documentation set.

Notes for Editors

This document should be maintained as a set of linked wiki pages rather than a single monolithic page. Each major section should have its own stable URI so it can be referenced from other wiki pages, exported documents, presentations, AI-assisted tools, and semantic models.

Do not rename pages once they have been cited externally unless a redirect or move plan is in place.
