

6.1 Overview

[Go to Top](#)

The Financial Systems Classification applies the [Archetype](#) Classification Model to financial structured-information systems.

Section 5 defines the general classification hierarchy shown in Figure 5.5-1 and identifies the financial [Classification Path](#) shown there. This section explains the financial meaning of that [Classification Path](#) by defining the [Finance Ecosphere](#), the [Monetary Ecosystem](#), and the [Foreign Exchange Domain](#).

The Financial Systems Archetype uses this [Classification Path](#) to establish the business and [Semantic](#) scope inherited by later logical profiles, implementation profiles, deployment profiles, and [Evidence](#) plans.
