

13.10 Profile and Layering Requirements

[Go to Top](#)

1. A [Domain](#) Profile SHALL preserve the conceptual definitions inherited from this part.
2. An Implementation Profile / [PSM](#) SHALL preserve the conceptual definitions inherited from this part.
3. A Deployment, Testability, and [Evidence](#) Plan SHALL preserve the conceptual definitions inherited from this part.
4. A later part SHALL NOT use a technology selection to redefine a conceptual element.
5. A later part SHALL NOT use a deployment decision to redefine a conceptual element.
6. A later part that introduces a new term SHALL identify whether the term is conceptual, logical, implementation-specific, deployment-specific, or evidence-specific.
7. A later part that introduces a new conceptual term SHALL identify its relationship to the conceptual architecture defined in this part.
8. A later part that specialises, realises, deploys, tests, or evidences a conceptual element SHALL preserve [Traceability](#) to that conceptual element.
