

2. Relationship to Part 0 and Part 1

[Go To Top](#)

Part 0 provides the Document Set Overview and Reader’s Guide for the Financial Systems Archetype. It explains the purpose of the document set, the relationship to SDIS/SIP-RA, the layered document structure, the onion model, document responsibilities, layering rules, and navigation guidance.

Part 1 defines the Conceptual Architecture for the Financial Systems Archetype. It establishes the conceptual definitions, classification model, separation-of-concerns model, [Runtime Plane](#) concepts, [Traceability](#) concepts, [Evidence](#) concepts, and conceptual requirements that later parts preserve.

This part depends on both Part 0 and Part 1. It relies on Part 0 for the document-set map and layering rules. It relies on Part 1 for the conceptual foundation.

Part 2 performs the second architectural role within the document set. It defines a single distributed, node-based Logical Architecture / PIM that conforms to Part 1. It specialises Part 1 concepts into platform-independent logical Nodes, [Logical Node Roles](#), [Logical Communication Endpoints](#), [Logical Data Structure Definitions](#), logical Runtime Planes, logical interaction patterns, logical governance relationships, and logical traceability relationships.

Table 2-1 summarises the relationship among Part 0, Part 1, and Part 2.

Table 2-1: Relationship among Part 0, Part 1, and Part 2

Part	Role
Part 0	Explains how to read and use the Financial Systems Archetype document set.
Part 1	Defines the Conceptual Architecture used by the Financial Systems Archetype document set.
Part 2	Defines a distributed, node-based Logical Architecture / PIM that conforms to Part 1.
