

13.5 Relationship to the FX Demo Logical Profile

[Go To Top](#)

The FX Demo Logical Profile provides the initial Domain Logical Profile for the Financial Systems Archetype.

The FX Demo Logical Profile specialises this distributed, node-based Logical Architecture / PIM for the Foreign Exchange Domain within the Finance Ecosphere and Monetary Ecosystem. It inherits the Logical Architecture defined in this part. It adds FX-specific [Logical Nodes](#), FX-specific [Node Roles](#), FX-specific [Communication Endpoints](#), FX-specific [Data Structure Definitions](#), FX-specific interaction patterns, FX-specific lifecycle concerns, and FX-specific [Traceability](#) and [Evidence](#) expectations.

The FX Demo Logical Profile belongs in Part 3. It does not belong in this part because Part 2 defines the reusable Logical Architecture that Domain Logical Profiles specialise.
