

4.7 Traceability from Concept to Logical Profile

[Go To FX Demo Logical Profile Principles](#)

The FX Demo Logical Profile preserves [Traceability](#) from Part 1 concepts and Part 2 logical elements to Part 3 FX logical profile elements.

Each FX logical [Node](#) traces to a [Logical Node](#) and to the Part 1 concept [Node](#). Each FX logical [Communication Endpoint](#) traces to a [Logical Communication Endpoint](#) and to the Part 1 concept [Communication Endpoint](#). Each FX logical information structure traces to a [Logical Data Structure Definition](#) or [Logical Data Structure Instance](#) and to the corresponding Part 1 concept.

This [Traceability](#) supports review, impact analysis, compatibility assessment, implementation mapping, deployment planning, testability planning, and [Evidence](#) planning.
