

12.10 Release FX Information to Oversight Participant

Go To FX Demo Logical Interaction Patterns

The Release FX Information to Oversight Participant pattern prepares and delivers authorized FX information to an External Oversight Participant.

The [FX Policy and Release Node](#) applies an [FX Policy Decision](#), selects authorized information, applies required redaction or transformation, records obligations, prepares an [FX Release Package](#), and makes the release package available to the External Oversight Participant through the [FX Release Package Endpoint](#).

The interaction belongs primarily to the [Logical Policy and Release Plane](#). It also supports the [Logical Audit and Provenance Plane](#) because released information requires [Traceability](#) to policy decisions, source information, obligations, delivery context, and [Evidence](#) expectations.

Table 12-9: Release FX Information to Oversight Participant interaction pattern.

Element	FX logical treatment
Primary Runtime Plane	Logical Policy and Release Plane
Producing FX Node Role	Release Control Role
Consuming FX Node Role	Oversight Consumption Role , Audit Recording Role , Provenance Recording Role
Primary endpoint	FX Release Package Endpoint
Primary information	FX Release Package
Supporting information	FX Policy Decision reference, source information references, recipient context, purpose, redaction or transformation context, obligations
Traceability expectation	FX Release Package traces to FX Policy Decision , source information, recipient context, obligations, producing Node , and provenance reference
Evidence expectation	Release records support review of authorized disclosure, release rationale, obligations, and accountability
