

4.7 Phase 0 Implementation Profile Summary

[Go To Phase 0 Implementation Profile Overview](#)

The Phase 0 Implementation Profile serves as the controlled bridge between the FX Demo Logical Profile and subsequent implementation work.

It defines the selected implementation mappings, technology context, artifact categories, repository and build expectations, Developer Handbook preconditions, and [traceability](#) relationships needed to support Phase 0. It prepares the implementation artifacts for Part 5, which addresses deployment, testability, runtime operation, observation, and [evidence](#).
