

15.12 Script Usage Requirements

[Go To Phase 0 Developer Handbook Requirements](#)

The Developer Handbook must define how contributors use Phase 0 scripts.

Script usage requirements must identify:

1. Purpose of each approved script
2. Required inputs
3. Expected outputs
4. Affected artifacts
5. Logging behavior
6. Error-handling behavior
7. Prerequisites
8. Cleanup behavior
9. Review expectations
10. Relationship to the Phase 0 implementation baseline

Scripts that generate artifacts, alter repository state, start implementation participants, stop implementation participants, or affect [Traceability](#) must follow handbook rules. Contributors must not use unapproved scripts to create or modify baseline artifacts.
