

19.2 Boundary Between Part 4 and Part 5

[Go To Top](#)

[Return to Relationship to Deployment, Testability, and Evidence Plan](#)

Part 4 defines the Phase 0 implementation [Baseline](#). It identifies selected implementation technologies, implementation artefacts, mappings, [DDS](#) Topics, [IDL](#) structures, generated types, [QoS](#) profiles, scripts, [Repository](#) organisation, Developer Handbook requirements, governance rules, and [Traceability](#) relationships.

Part 5 defines the Phase 0 [Deployment](#), testability, operation, [Observation](#), and [Evidence](#) approach. It identifies how the implementation artefacts defined in Part 4 are deployed, started, exercised, observed, reviewed, and evidenced.

Part 4 does not define Deployment topology, runtime environment configuration, operational runbooks, test execution results, Evidence packages, dashboards, [Kubernetes](#) or [K3s](#) Deployment, [Crucible](#) scenarios, or acceptance Evidence. Part 5 owns those concerns.

Part 5 does not redefine the implementation artefacts defined in Part 4. It deploys, tests, observes, operates, and evidences those artefacts.
