

20.11 Deployment and Evidence Concerns Remain Outside Part 4

[Go To Top](#)

[Return to Phase 0 Implementation Rules and Constraints](#)

Part 4 prepares implementation artefacts for [Deployment](#), testability, [Observation](#), operation, and [Evidence](#). It does not define deployment topology, runtime operations, test execution, [Acceptance](#) evidence, runtime evidence, dashboards, [Kubernetes](#) or [K3s](#) deployment, [Crucible](#) scenarios, or final evidence packages.

Part 5 owns those concerns. Part 5 deploys, tests, observes, operates, and evidences the implementation artefacts defined by Part 4.

This boundary prevents deployment and evidence choices from redefining the implementation profile or the logical architecture.
