

21.1 Overview

[Go To Top](#)

[Return to Phase 0 Implementation Requirements](#)

This section defines the formal requirements for the Phase 0 Implementation Profile / PSM.

The requirements in this section preserve the relationship between the Part 3 FX Demo Logical Profile and the selected Phase 0 implementation artefacts. They ensure that Phase 0 implementation work remains [Traceable](#), [Governed](#), repeatable, reviewable, and ready for later [Deployment](#), testability, [Observation](#), operation, and [Evidence](#) planning.

These requirements apply to Phase 0 implementation artefacts, [DDS](#) Topic mappings, [IDL](#) structures, generated types, [QoS](#) profiles, [Repository](#) artefacts, scripts, Developer Handbook rules, implementation governance, implementation Traceability, and the Part 5 handoff.
