

# 21.15 Part 5 Handoff Requirements

## Go To Phase 0 Implementation Requirements

This section identifies the normative requirements established for the Phase 0 handoff from Part 4 to Part 5. The canonical requirement statements are maintained in [Annex D: Requirements, Part 4, Section 21.15](#).

**Table 21-14:** Part 5 handoff requirements.

| Requirement ID                   | Statement                                                                                                                                                                                                         |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">P4-REQ-21-15-001</a> | The Phase 0 Implementation Profile / PSM SHALL identify implementation artifacts prepared for Part 5 deployment, testability, operation, observation, and evidence planning.                                      |
| <a href="#">P4-REQ-21-15-002</a> | The Part 5 handoff SHALL identify implementation node mappings.                                                                                                                                                   |
| <a href="#">P4-REQ-21-15-003</a> | The Part 5 handoff SHALL identify DDS Topic mappings.                                                                                                                                                             |
| <a href="#">P4-REQ-21-15-004</a> | The Part 5 handoff SHALL identify IDL and generated type mappings.                                                                                                                                                |
| <a href="#">P4-REQ-21-15-005</a> | The Part 5 handoff SHALL identify QoS profile mappings.                                                                                                                                                           |
| <a href="#">P4-REQ-21-15-006</a> | The Part 5 handoff SHALL identify Runtime Plane realization.                                                                                                                                                      |
| <a href="#">P4-REQ-21-15-007</a> | The Part 5 handoff SHALL identify interaction pattern realization.                                                                                                                                                |
| <a href="#">P4-REQ-21-15-008</a> | The Part 5 handoff SHALL identify repository organization.                                                                                                                                                        |
| <a href="#">P4-REQ-21-15-009</a> | The Part 5 handoff SHALL identify the script model.                                                                                                                                                               |
| <a href="#">P4-REQ-21-15-010</a> | The Part 5 handoff SHALL identify Developer Handbook requirements.                                                                                                                                                |
| <a href="#">P4-REQ-21-15-011</a> | The Part 5 handoff SHALL identify implementation governance rules.                                                                                                                                                |
| <a href="#">P4-REQ-21-15-012</a> | The Part 5 handoff SHALL identify implementation traceability relationships.                                                                                                                                      |
| <a href="#">P4-REQ-21-15-013</a> | Part 4 SHALL NOT define deployment topology, runtime operations, test execution, acceptance evidence, runtime evidence, dashboards, Kubernetes or K3s deployment, Crucible scenarios, or final evidence packages. |
| <a href="#">P4-REQ-21-15-014</a> | Part 5 SHALL NOT redefine the Phase 0 implementation artifacts defined by Part 4.                                                                                                                                 |
