

6. Prerequisites and Tooling

[Go To Top](#)

This section defines the tools that the team needs to create, build, run, inspect, and validate the Phase 0 [Baseline](#). The team should treat prerequisites as part of the controlled implementation environment, not as informal developer preferences. A developer should be able to install the required tools, run the prerequisite check, and prepare the [Repository](#) without relying on undocumented local knowledge.

Contents

- [6.1 Required Tools](#)
- [6.2 Optional Tools](#)
- [6.3 Version Requirements](#)
- [6.4 Tool Installation Notes](#)
- [6.5 Prerequisite Validation](#)
- [6.6 Troubleshooting Tool Issues](#)
- [6.7 Tool Baseline Checklist](#)
- [6.8 Multiple Products, Platforms, and Implementations](#)
- [6.9 Tool Baseline Checklist Instances](#)
