

16. Exception Handling

[Go To Top](#)

This section defines how the Phase 0 [Baseline](#) handles errors, exceptions, failures, degraded behavior, and recovery. Exception handling should make failures visible, diagnosable, and reviewable. It should not hide errors or allow the [Node](#) network to appear healthy when required behavior has failed.

Contents

- [16.1 Purpose of Exception Handling Rules](#)
- [16.2 Node Exceptions](#)
- [16.3 Script Failures](#)
- [16.4 Configuration Errors](#)
- [16.5 DDS Communication Errors](#)
- [16.6 Container Errors](#)
- [16.7 Recoverable and Non-Recoverable Errors](#)
- [16.8 Error Reporting](#)
