

17. Git and Review Workflow

[Go To Top](#)

This section defines how the team uses Git and review practices to control the Phase 0 [Baseline](#). Git provides version control, but review provides discipline. Together, they help the team keep [Repository](#) structure, source files, generated [Artifacts](#), scripts, [Configuration](#), containers, tests, documentation, and [Evidence](#) traceable and reproducible.

Contents

- [17.1 Repository Initialisation](#)
- [17.2 Branching Approach](#)
- [17.3 Commit Conventions](#)
- [17.4 Pull Request Expectations](#)
- [17.5 Review Checklist](#)
- [17.6 Generated File Review Rules](#)
- [17.7 Tagging the Phase 0 Baseline](#)
- [17.8 Review of Documentation and Comments](#)
- [17.9 Review Outcomes](#)
- [17.10 Relationship to Issues and Decision Records](#)
