

9.4 Accounting Basis

Return to Operating Model

The Cost Recovery, Compensation, and Settlement Plane uses ordinary accounting concepts. It does not require blockchain, tokenisation, cryptocurrency, speculative payment mechanisms, or a separate monetary system.

The plane supports accounting outcomes such as:

- Service charges
- Usage-based fees
- Internal chargebacks
- Intercompany allocations
- Regulated cost recovery
- Consortium settlement
- Reimbursement
- Infrastructure levies
- Provider compensation
- Persistence charges
- Evidence-retention charges

The plane supplies structured operational and evidentiary records that support accounting entries. Accounting systems, contracts, regulations, and organizational policies determine the final accounting treatment.
