

10. FX Demo Application

[Go to Top](#)

The FX Demo applies the [Cost Recovery, Compensation, and Settlement Plane](#) to a governed foreign-exchange processing scenario. The demo shows how economic accountability connects to work attribution, policy obligations, [Evidence](#) references, provider qualification, cost rules, and settlement outcomes.

The demo does not implement production billing, payment execution, tax treatment, or legal settlement. It demonstrates the architectural pattern for evidence-linked cost attribution and shows how the plane separates efficient compliant processing from under-compliance.

- [10.1 Use Case](#)
- [10.2 Conceptual Flow](#)
