

13. Phase 0 and Later-Phase Treatment

[Go to Top](#)

Phase 0 may include only placeholders for this plane. Phase 0 does not need to implement real billing, settlement, accounting integration, or provider competition. A later demo phase may introduce:

- Mock cost rules
- Mock provider qualification records
- Mock compensation claims
- Mock settlement instructions
- Persistence cost records
- Evidence-linked work records
- Non-performance alerts
- Provider substitution scenarios

The first implementation objective should demonstrate the architectural pattern rather than commercial completeness.
