

6.4 Required Submission Content

[Return to Specific Requirements on Proposals](#)

A Submission provides the specification material needed to evaluate the proposed [Reference Architecture](#) against the requirements of this RFP.

Requirements

Requirement	Statement
SIP-042 — Complete Reference Architecture Specification	The Submission SHALL include a complete specification of the proposed Reference Architecture that addresses all applicable requirements defined in Section 6.2 Scope of Proposals Sought and Section 6.3 Relationship to Other OMG Specifications .
SIP-043 — Integrated Submission Document	The specification MAY be submitted as a single integrated document.

This page identifies the subsections for Required Submission Content.

- [6.4.1 Architectural Description](#)
- [6.4.2 Platform-Independent Model Definition](#)
- [6.4.3 Data, Structure, Semantics, and Interpretation](#)
- [6.4.4 Flow and Interface Definition](#)
- [6.4.5 Governance and Authority](#)
- [6.4.6 Implementation Conformance Model](#)
- [6.4.7 RFP Traceability](#)

Notes for Editors

The requirement identifiers and short titles link to the authoritative requirement records in Annex C.

The Statements displayed in this section are transcluded from the corresponding Annex C requirement pages and are not independently maintained copies.

Make changes to a Statement on its Annex C requirement page.

SIP-042 establishes the required completeness of the submitted specification. SIP-043 permits the specification to be organized as one integrated document but does not require that document organization.

If Section 6.4 has no subordinate pages, remove the sentence introducing the subsections and the Indexmenu statement.
