Figure D.7-1: SIP-RA High-Level Architectural Context

Key Relationships

- Independently governed Domains retain their own Systems, platforms, Vocabularies, Policies, jurisdictions, and Authorities
- Federated interfaces, mappings, and agreements support structured information exchange
- SIP-RA separates Data, Structure, Semantics, Interpretation, and Governance
- Operational information flow remains distinct from Governance control
- The architecture supports interoperability, Traceability, Reproducibility, controlled evolution, and jurisdictional sovereignty
