Structured Information Processing Reference Architecture (SIP-RA) RFP

Dido Solutions, Inc.

September 2026

13639 Jackrabbit Road

Poway, California, USA, 92064-1701

Purpose

This request for proposals seeks a platform-independent Reference Architecture governing the controlled processing of structured information artifacts in mission-critical and regulated environments. The requested architecture defines architectural constructs that separate data, structure, semantics, and interpretation; establish governed processing flows across defined boundaries; preserve jurisdictional authority over structural and semantic definitions; and support modular, inspectable, and reproducible information processing independent of specific implementation technologies.

Contents

- [1. Structured Information Processing Reference Architecture](#)
- [2. Purpose of This Briefing](#)
- [3. What Is SIP-RA?](#)
- [4. The Structured Information Problem](#)
- [5. Islands of Automation](#)
- [6. The SIP-RA Architectural Separation](#)
- [7. High-Level Architectural Context](#)
- [8. Why Are We Proposing SIP-RA?](#)
- [9. Why SIP-RA Matters](#)
- [10. Why OMG and Why MARS?](#)
- [11. Participation and Next Steps](#)
